Revision Notes

Notes and MRL values shown are those applicable when the PPPL was created. Actual values could be different.

Note 1 Expiry date near. Product will expire within 12 months from PPPL submission.

Note 2 Low GB MRL. High risk due to low MRL set in GB. It is critical to observe PHI and avoid repetition of applications. Whenever possible extend PHI and do not use near harvest. If possible consider alternative chemical or non-chemical control measures.

Note 3 MRL GB compliance problems. It has been detected in the past residues above or very close to the UK MRL. Strictly observe good agricultural practices and label indications and wherever possible extend PHI, avoid repeated applications and do not use near harvest.
