Revision Notes

Notes and MRL values shown are those applicable when the PPPL was created. Actual values could be different.

Note 1 WHO Class I.b Highly Hazardous. Classified by the World Health Organization as highly hazardous for humans based on oral and dermal acute toxicity. Plant protection product handlers should be specially cautious.

Note 2 Low GB MRL. High risk due to low MRL set in GB. It is critical to observe PHI and avoid repetition of applications. Whenever possible extend PHI and do not use near harvest. If possible consider alternative chemical or non-chemical control measures.

Note 3 Expiry date near. Product will expire within 12 months from PPPL submission.

Note 4 MRL GB compliance problems. It has been detected in the past residues above or very close to the UK MRL. Strictly observe good agricultural practices and label indications and wherever possible extend PHI, avoid repeated applications and do not use near harvest.

Note 5 Non-renewal of approval of the active substance Indoxacarb in the European Union

For EU producers:

- Withdrawal of authorisations: 19 March 2022

- Max. period of grace: 19 September 2022

For ALL producers (EU and non-EU):

- This may have an impact on the MRL. For further information check Regulation (EU) 2021/2081 or contact us.
